⁽¹⁾Hamman Chellala Thermal Center, Guelma, Algeria
belaitara@yahoo.fr

The communication is about the thermalism in Algeria, it is presented the thermal potentialities in Algeria, as defined during the last thermal assessment carried out in 2015.

It also presents the establishments in operation throughout the national territory, the projects in progress as well as the operations related to the upgrading of the personnel working in these establishments.

Finally, a brief overview of the 2030 sector's development plan is presented in terms of issues, strategic orientations and the action plan to be implemented.
